THE MISSOURI MINER

Missouri School of Mines & Metallurgy

VOLUME 32

ROLLA, MISSOURI, TUESDAY, JANUARY 29, 1946

NUMBER 16

600 ENROLLED AT MSM MONDAY

Dean Wilson Welcomes New Students to MSM

All new students just enrolled at MSM—a cordial welcome! Former students now returning welcome back again! After all the trials and sacrifices of war, our School of Mines returns engineering education for peace, instruction and progress.

You will find here a college devoted to engineering education and research. Our laboratories, while not means complete, are among the best in equipment and facilities. Our library of 65,000 volumes gives you a wealth of information and inspiration.

You will find a faculty of outstanding men who are specialists in their fields and who in addition are capable, sympathetic teachers. Their greatest satisfaction lies in helping you. I urge that you become well acquainted with them and their classes with determination to learn. Consult them frequently for advice and guidance.

Mid-winter the campus is not beautiful, but in spring, summer and fall it is a thing of beauty. Now you will take pride in it help us keep it beautiful.

You will find that Rolla is a place of kind and hospitable people. You are too happy to welcome them. Their churches are open to you and I strongly recommend you attend regularly the church of your choice. Our pastors are fine spiritual leaders who are definitely and highly interested in you. The student body is made up of men of initiative and ambition. They will accept you for who you are, and will welcome you to many student organizations on our campus—professional, social, fraternal. It will not take you to get acquainted and I am confident it will not take you long to become imbued with the school spirit so manifest at Missouri School of Mines.

College years are the happiest of life. Take advantage of this golden opportunity to train and develop yourselves, not only in engineering and science but also in character and personality. Then you realize it you will be benefiting from these halls of learning and will join that great group of Alumni of MSM who have distinguished themselves and shed credit upon their Alma Mater.

Close this brief welcome by extending to you a cordial invitation all upon me in my office whenever you feel so inclined. My office is always open. Like other faculty members, I am here primarily to help you, and nothing gives me more pleasure. I pledge my efforts to make your sojourn pleasant and beneficial.

CURTIS L. WILSON, Dean

NOTICE

Anyone who has played any high-school basketball or has previous basketball experience, is invited to report to Coach Hafeli today at 4:00 for varsity basketball practice.

St. Pat's Board to Give Benefit Show

The St. Pat's board has a benefit show booked for them at the Uptown for next Tuesday and Wednesday, Feb. 5 & 6. The name of the show is "Man Alive", a comedy starring Pat O'Brien, Ellen Drew, Rudy Vallee and Adolphe Menjou.

Tickets for the show are on sale now by any of the members of the St. Pat's board. The benefit show is being given as a measure to raise money for the annual spring St. Pat's celebration to come this year on March 14-15-16.

St. Patrick was an Irishman and by coincidence the benefit show "Man Alive" stars the very Irish Pat O'Brien. Pat O'Brien co-starred with Adolphe Menjou and Ellen Drew in the R-K-O picture,

Rudy Vallee, star of "Man Alive", the St. Pat's benefit show on February 5-6.

plays the part of a forthright Irishman who gets himself befogged in a martial impasse, when, following a quarrel with his wife, he has an accident and is declared dead. Very much alive, Pat endeavors to save his "widow" from interloper Rudy Vallee, and plays "ghost" at the behest of fixer Menjou. The romantic complications with Rudy Vallee prove to be a film funfest.

Bob Heineck, president of the St. Pat's board has expressed his hope that most of the student body will purchase tickets to the benefit show so that the yearly extravaganza will be as big a celebration as ever.

A Scotch farmer back from the country fair with a new horse found the animal refused to eat or drink. The farmer's eyes gleamed hopefully: "By golly, I've got a real bargain if he's a good worker."

Convocation, Wednesday 10 a. m.

PRESIDENT MIDDLEBUSH TO BE FIRST CONVOCATION SPEAKER

Dr. Frederick A. Middlebush, President of the University of Missouri, will speak to the students and faculty of MSM on Wednesday morning, January 30, at 10 o'clock in the auditorium of Parker Hall. This will mark the first convocation of the 1946 spring semester. Dean Curtis L. Wilson will preside and will introduce President Middlebush.

HOW AND WHERE TO GET YOUR MINER

Starting with next week's edition of the MINER, all of those subscribers to the paper who don't live at any fraternity or club house can get their copy of the MINER by calling for it at the military room in the basement of Parker Hall between the hours of 12:15 and 1:00 p. m. and 4:00 and 6:00 p. m. on Tuesday. The circulation staff will deliver all the papers to the subscribers who live at any of the fraternity or club houses on the campus; this includes Mrs. Perry's eating establishment.

Co-manager of the circulation staff Eric Roloff stated, "Although this system is not all that could be desired, we feel that under the existing circumstances it is the best possible compromise."

Miner Board Welcomes Tryouts

Many of the members of the Miner Board have graduated or left school for the armed forces. Thus, the board needs new tryouts to fill the vacated positions in the various departments and to help publish the new, larger paper. Under the provisions of the Constitution, a tryout serves as a member of the staff of the Missouri Miner for one semester, after which, if he has satisfied the requirements for membership, is elected to the Miner Board.

Positions are open in all departments, providing an ample opportunity for anyone interested in the college newspaper to work on the staff.

The Miner Board of the Missouri School of Mines and Metallurgy was established for the purpose of publishing a weekly newspaper, known as the Missouri Miner. The Miner Board is divided into five departments namely: News, Business, Advertising, Editing and Circulation.

The News Department is divided into three branches: general news, features, and sports. The purpose of the News Department is to gather and write all news articles for publication in the Missouri Miner. The sports staff works independently of the regular news staff, and its members are to gather news of all athletic events at the School of Mines and of any other athletic contests to which the Editor may assign them.

Those not interested in the News Department are urged to try out for either the Business, Circulation, Advertising, or Editing Staff

Majority Freshmen; Shortage of Rooms Acute

At five o'clock Monday around 600 students had enrolled for the Spring Semester according to an unofficial report from the Registrar's office. Of the total enrollment, around 45 per cent were returning veterans.

This figure was the largest single day enrollment since 1943. Mr. Hubbard, registrar, said he expected the total enrollment to be between 700 and 800.

NEW PROFS. ABOUT THE CAMPUS

With the new semester here, many of you Miners will be seeing unfamiliar faces among the professors here. Some of those faces will belong to new professors, while others will belong to former MSM professors who are returning to their alma mater. In order to help you get acquainted with these professors, this column will present a little sketch of the men's collegiate past.

The Department of Mathematics claims two of our new professors, O. L. Loomis and R. W. Oesch. Both of the men hold the rank of Instructor in Mathematics. Mr. Loomis graduated from Bellevue Collegiate Institute in 1900 with a Bachelor of Science, received his B. Ed. at Cape Girardeau Teachers College in 1903, and received his B. S. in Education and Masters Degree at University of Missouri in 1932 and 1933, respectively. Mr. Loomis's vocation for many years was as an abstracting engineer. Mr. Oesch graduated from University of Illinois in 1939 with a Masters Degree in Business Administration. Upon graduation from Illinois, he served with the U. S. Army Transportation Corps.

Two of our former Chemistry professors have returned to MSM, these are Dr. F. H. Conrad, Associate Professor of Chemical Engineering and Wm. H. Webb, Instructor in Chemical Engineering. Dr. Conrad graduated from Washington University in 1923 with a B. S. in Chemical Engineering and received his Ph. D. in 1934 at the same school. Until recently he was a Major in the U. S. Army. Mr. Webb graduated from Mississippi State College with a B. S. in Chem. Eng. in 1935 and received his Masters Degree at MSM in 1939. During his leave of absence, he served as a Captain in the U. S. Army.

The Geology Department has announced that they have added two new men to their staff. Dr. Roger H. Cowie is the new Assistant Professor.

(Continued to Page 2)

as these departments need tryouts also.

The Miner Board holds regular weekly meetings at five p. m. Tuesdays, in room 10 of Parker Hall; and anyone interested in trying out for a position on the board is invited to attend these meetings.

The Freshmen class were in the majority with 265 members. The other classes shaped up as follows: Sophomores, 95; Juniors, 85; Seniors, 46; graduate students, 12; unclassified students, 8; and special students, 10.

The rooming situation was becoming more tense as the day progressed. At 5:00 o'clock Monday, about fifteen rooms were still available around town. Bunks have been placed in the gymnasium, and will be used if the situation demands it.

No Classes Tuesday

A statement was released in the Dean's office Monday at 5:30, that regular classes would not begin Tuesday morning due to the fact that so many of the returning veterans were unable to be enrolled Monday.

Regular classes will begin at 8:00 Wednesday morning. Remember the convocation Wednesday at 10:00 o'clock.

Vets Eligible for Advanced ROTC

Major E. C. Richardson, director of military training activities at the Missouri School of Mines, announced Wednesday that the advanced course will be reactivated the second semester.

Several changes have been made in the program.

Any physically fit veteran between 19 and 26, who served for a period of at least one year, and requires at least two academic years to complete work for a degree, is eligible for enrollment in the advanced course.

Under the new program subsistence allowance has been increased from \$7.50 per month to approximately \$21. In addition a complete officer-type uniform including shoes and overcoat will be issued.

Students eligible for the advanced course, are exempt from registration, induction, training or service under the Selective Service Act.

Applications are now being accepted by the Military Department.

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Tuesday during the school year. Entered as second class matter February 8, 1945 at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

Welcome !!

We, the MINER board and staff, wish to extend a hearty welcome to all the new and returning members of the student body and faculty. To the returning Miners, who know and love the school, we are glad to welcome you back to the campus. To the new Freshmen, who are beginning their college career, we offer our congratulations on your selection of our school.

The MISSOURI MINER has increased its size and circulation to meet the demands of the larger enrollment. As in the past, the MINER will print the news of interest to the students, faculty members, and board of directors, and all worthy editorials pertaining to the interests of the student body. Letters to the editor will be received and printed if they are of campus nature and do not refer to private feuds.

In closing, the editor extends an encouraging welcome to any student who wishes to write or work on his school paper.

NEW PROFS. ABOUT THE CAMPUS

(Continued from Page 1)

sistant Professor of Geophysics, and came to MSM from Oklahoma A. & M. College, where he was an Instructor in Physics. Dr. Cowie graduated from California Institute of Technology with a B. S. in Geology. He received his Masters and Ph. D. at University of Minnesota in 1940 and 1941, respectively. Dr. C. H. Summerson is the new Assistant Professor of Geology and came to MSM from the United States Geological Survey in Washington, D. C. Dr. Summerson graduated from the

University of Illinois in 1938 with a B. S. in Geology; he received his Masters and Ph. D. at the same school a few years later.

The third floor of Norwood Hall is laying claim to two of our new professors; James F. Rushing, Instructor in Engineering Drawing and Robert H. Webber, Instructor in English. James Rushing graduated from the Civil Department of MSM in 1940, after which time he worked with the Land Department of the Tennessee Coal, Iron, and Railroad Co. Until recently he was a Captain in the U. S. Army Corps of Engineers. Mr. Webber is returning to MSM after spend-

ing his leave of absence as a Lt. in the U. S. Army Air Corps. He graduated with both his A. B. and M. A. from the University of Nebraska.

Harris Hall is also claiming two of our new professors; Robert F. Davidson, Instructor in Mechanics and V. A. C. Gevecker, Assistant Professor of Civil Engineering. Mr. Davidson received his B. S. in Civil at Missouri Mines in 1941; after which time he served with the Army Engineers, and was Chief Surveyor for the Contractors who built Fort Leonard Wood. Mr. Gevecker graduated from MSM with a B. S. in Civil and received his Masters Degree at California Institute of Technology. During his leave of absence he served as a Major in the U. S. Army.

T. J. Planje, a new Instructor in the Ceramics Dept., received his B. S. in Ceramic Engineering at MSM in 1940. Upon graduation he entered the Army Air Force where he was a Captain in charge of Radar Plans and Operations.

As the representative of the Student Body, The Missouri Miner wishes to welcome all the new additions to the faculty to Missouri School of Mines and we hope you will enjoy it here.

Convocation, Wednesday 10 a. m.

EX-MINER WILLIAMS ENTERS OLYMPICS

The following article concerning a former MSM student, Ray Williams of Triangle fraternity, was taken from the St. Louis Globe-Democrat last Thursday morning, January 24. In the spring of 1945 Ray set two new records for intramural swimming here on the campus. The records he set are the 60 yd. breast stroke in 37.9 seconds, and the 120 free style in one minute and 16 seconds. Ray was also on the Triangle 120 yd. relay team that placed first in the intramural contest.

St. Louis Globe-Democrat-1-24-46
Ray Williams, former Cleveland High School swimmer and life guard at several local pools, has qualified to swim in the finals of the Army Olympic championship games to be held in Honolulu, Hawaii, Jan. 29.

Williams, currently attached to the Eleventh Airborne Division stationed in Japan, is the holder of several Ozark A. A. U., interscholastic high school and Munsy swim titles. He also participated in intramural swimming and boxing tournaments while a student at Missouri School of Mines in Rolla, Mo., before entertaining the service.

JOKES

Two friends were motoring home from a fishing trip to Maine when they encountered engine trouble on a lonely road at dusk.

Of course, they knocked at the door of a farm house down the road and the farmer's beautiful daughter answered their knock.

She gave them dinner and let them stay over night. Six months later one of the friends received an ominous looking legal document. A frown disappeared as he read it, and then he phoned his fishing companion: "I say, Tom," he said, "did you by any chance spend little time with that beautiful farm girl the night our car broke down?"

"Why — ah — yes," answered Tom, sheepishly.

"And did you, in a moment of Machiavellian cunning give her your name and address?"

"Now don't get sore about that broke in Tom. 'Where's your sense of humor?'"

"Oh, I'm not a bit sore," his friend assured him. "I just thought you'd like to know I've heard from her lawyer. She died last week and left me the farm and \$12,000 cash."

"I'm cutting quite a figure," said the chorus girl as she sat on a broken bottle.

"Was your husband in comfortable circumstances when he died?" "No. He was half way under the train."

Miner Takes Parks 44-41 Se To W. U. 71-42

their second game in as many weeks, the Miners came out victorious over Parks Air College by a score of 44-41. The game was played last Saturday night in East St. Louis. Due to a mixup in the lineup, Bob Bruce, Miner forward, was unable to play.

The game was one of those affairs with many shots and many fouls. A total of 63 fouls were committed, 31 on the Miners, and 32 on Parks. An overtime period was needed to decide the contest. Bill Hill sank the deciding shot. Bob Kemper led the scoring with 13 points, with 11 of them being free throws. Hill was with 9 markers. Anderson, forward, topped the host's list with 11.

R. Tappmeyer—Miner Center

Washington U. Trounces Miners

Last Friday night, January 25, the Miners met the Washington U. Bears at the latter's field house in St. Louis, and were badly defeated 71-42. Stan London and Don Schultz proved to be the Miners' stumbling blocks. Swarthy London caged 20 points while Schultz hit 14. Individual defensive honors went to Schultz who did an excellent job of blocking the shots off Ronald Tappmeyer, Miner center. Bob Bruce held the high-scoring London to 6 points in the first half, but the second told a different story.

Although the game was never close, the Miners were in there all the way, and in their opponents' eagerness, they made good on 19 out of 28 charity tosses. Tappmeyer paced the Miners with 14 points and Bruce connected for 13.

Two new Miner players made their debut over the weekend. They are forwards Winnenberg and Whitaker. Coach Hafeli believes they have promise and ability to become valuable assets to the squad.

AROUND THE MIAA

By GENE TYRER

Conference competition continued last Friday, January 25, when the Warrensburg Teachers defeated Cape Girardeau 42-40. Cape had a one-point lead on the Mules with three and a half minutes to play. Syd Silverman, however, put his team ahead on a field goal at 37-36 and the Indians never caught up again. Sellman led the victor's scoring with 9 points while Campbell paced Cape with 13.

On January 26, the Springfield Bears strengthened their hold on second place by taking the measure of the Cape Girardeau quintet 44-40. The Bears broke through the close knit Cape defense in a second period scoring spree. Ruble led the victor's scoring with 12

Boxing and Wrestling

The high enrollment that is expected this semester should offer new contestants and stiff competition to the winners of last year's intramural boxing and wrestling tournament. This year, both boxing and wrestling matches will be held on the nights of March 27, 28 and 29. The preliminary bouts will start at 7:00 and the finals, on the 29th, will begin at 8 o'clock.

The boxing bouts consist of three two minute rounds with a one minute rest period in between the rounds. The wrestling matches are conducted in the following fashion. If one of the contestants is pinned during the first two minutes, the opponent is declared the winner. If both men wrestle past the two minute period, then a contestant must be pinned twice before a winner is announced. The opponent may still win the fight after he has been pinned once by throwing the other contestant in less time that was required for the first fall.

Each intramural organization is planning, while Burns paced the losers with a total of 16 markers. Much of the success of the Bears is due to the fine play of their big center, Preston Ward. Ward has averaged 17.6 points in 9 games thus far—67 of them against four M. I. A. A. foes.

allowed one contestant in each weight class, and no one may enter both the wrestling and boxing matches. Each entry must weigh into his class by 5 p. m. of the day preceding the matches in order that the coaches may have time to match the contestants. Entries may be two pounds overweight and still qualify for their weight division.

Last year's winners of the wrestling tournament were as follows: 118 lb. class; Wood, Pi. K. A.; 126 lb. Aubuchon, Pi. K. A.; 136 lb. Nishioka, Eng. Club; 145 lb. Miller, Lambda Chi; 155 lb. Nomi, Eng. Club; 165 lb. Isbell, Lambda Chi; 175 lb. Fisher, Sigma Nu; and heavyweight, Buterbaugh, Lambda Chi.

The boxing winners were: 118 lb. class, McKenzie, Pi. K. A.; 126 lb., Alvarez, Kappa Sig; 135 lb., (Continued to Page 4)

Church of The Week

Editor's Note: This is the first in a series of articles to be published concerning the youth activities in the churches of Rolla.

Methodist

This church is located at the corner of Ninth and Main Streets.

The minister of this church is Ralph H. Hicks. Both he and his wife are very apt at leading youth in worship and recreation.

At 9:45 a. m. every Sunday morning classes are held which include one for the above high school unmarried group and a newly or-

ganized group of younger married couples. This last mentioned class has also a monthly social function as part of its activities.

At 10:50 a. m. church service. All are welcome to attend.

In the evening at 6:30 a fellowship supper is held, after which programs in fields of interest in Christian living are presented. These fellowship suppers are usually of interest to new students because of eating conditions on Sunday night. The present topic is Boy and Girl Friendships. Reverend Hicks is the leader of this discussion which is both interesting and helpful to the group.

On the second and fourth Wednesday nights of each month at 8:00 the meetings of the Wesley Foundation are held. All college students are welcome to these meetings. The theme subjects of the programs deal with campus life.

INTRAMURAL RIFLE MARKSMANSHIP

An Intramural Rifle Marksmanship contest is scheduled for March 11-13-14. The matches will be under the direction of the Military Department and will be held each night at 7:00 o'clock.

Rules:

- (1) Each organization will present a five man team.
- (2) Each man will fire a five shot target in each of the following positions: prone, sitting, kneeling, and standing.
- (3) Practice on ranges will be open on Tuesday and Friday afternoons from 3:00 to 5:30 starting on February 18th.
- (4) The high scoring man in each individual position and the high aggregate winner will receive a gold medal.
- (5) Points awarded will be the same as in tennis

Southern California Prof. Discusses World Peace

By Associated Collegiate Press

"War is not inevitable, but a lasting peace depends upon modified and improved human and social conditions which may, in the next hundred years or more, result in an international society," explained Dr. Herbert Searles in his address to the philosophy forum at the University of Southern California.

Dr. Searles, professor of philosophy, outlined three approaches to the task of achieving international society:

First, through the understanding of human nature and learning how to improve, through education and through individual char-

matches.

- (5) Entries must be in by Friday, February 8, no later.

The scheduled matches are as follows:

Monday, March 11—Kappa Sig—Theta Kap—Triangle.
Wednesday, March 13—Engineer Club—Sigma Nu—Lambda Chi.
Thursday, March 14—Pi K A—Sigma Pi—Veterans.

acters and personal attitudes of our rising generations.

Second, through social research in human relationships involving cultural and economic resources and their relation to world populations as a basis for a program which will relieve, at least, the greatest economic tensions existing today.

Finally, through the development of the United Nations organizations and its counterpart international law.

"We must recognize at the outset that peace is not static condition in which we can rest once the active phase of the conflict is passed," said Dr. Searles. "Peace is not as dynamic in the spectacular sense as war, but it is exceedingly dynamic in other important senses."

"It is during the periods of armistice between wars when tensions are accumulated, when conditions are created in the economic and social arenas which disturb the equilibrium, and for which correction and alleviation is sought through recourse to war."

In discussing the need for education of our enemies, Dr. Searles believes that we must proceed on the basis of fact that both Germany and Japan have been defeated in a war of their own devising. Since such extreme propaganda methods were employed for moulding the enemy youth, some similar methods must be employed, to a degree, in their re-education.

Speaking of economic resources and populations, Dr. Searles said that atomic energy may provide power resources in unlimited quantities. These quantities present methods of artificial production of substitutes and methods of revitalizing exhausted soils. Thus the whole problem of over-population, which is today held to be of paramount importance in causing tension and international strife may become irrelevant within a few years. THE DAILY TROJAN, University of Southern California, Los Angeles, California.

Proud Father: "What shall we call it?"

Fond Mother: "Let's call it 'Quits'."

"My mother cooks her beans upside down," said little Jimmie proudly "and I get the hiccoughs."

Mother: "Sonnie, would you like to sleep with Nurse tonight?"

Sonnie: "Daddy, what would you do?"

Convocation, Wednesday 10 a. m.

ALL APHRODITE NEEDED... WAS A PERMANENT WAVE!!

NOT EVEN a Grecian Sea-Goddess can make with the glamour, if lank, dank locks cramp her style. Sleek, golden undulations are dreamy—but definitely! With a sharp permanent, Aphrodite could probably have pitched big-time woo on Olympus with Ziggy Zeus himself. The old rug-cutter!

All the intricate parts of a permanent wave machine—including the aluminum—were on earth when Aphrodite made her breath-taking entrance in a sea-foam bubble gown . . . but even the oracle at Delphi lacked the sapience to imagineer them.

We invented the word "Imagineering"* to describe how Alcoa, and other great groups of technicians go about the job of supplying the methods, materials and machines of modern life.

Today . . . Youth laments that there are no new lands to discover, no new frontiers to cross. And yet, in the uncharted Kingdom of the mind, hardy pioneers are daily spanning new horizons in the twin fields of invention and adaptation.

Aluminum offers exciting new opportunities to every intrepid Imagineer . . . who seeks new industrial worlds to conquer.
